powder

Bees wrap

replacement tooth powder

By heating the Beeswrap's margins, the replacement powder is folded

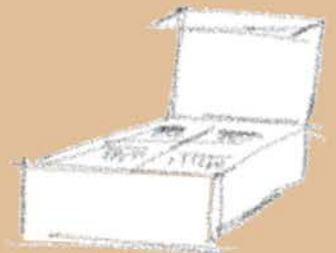

mouthed

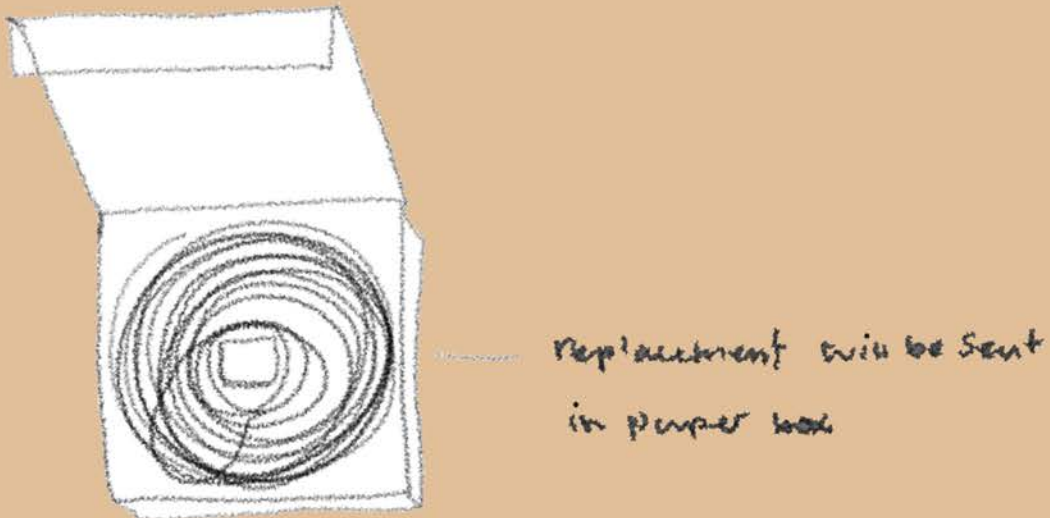

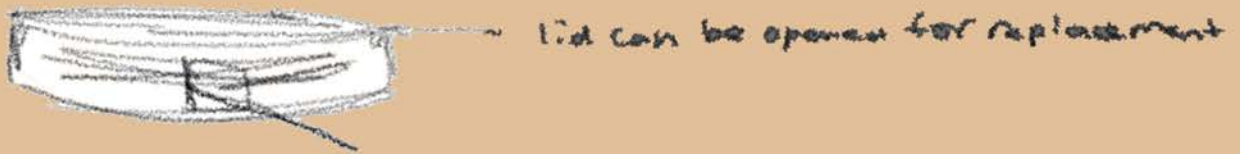

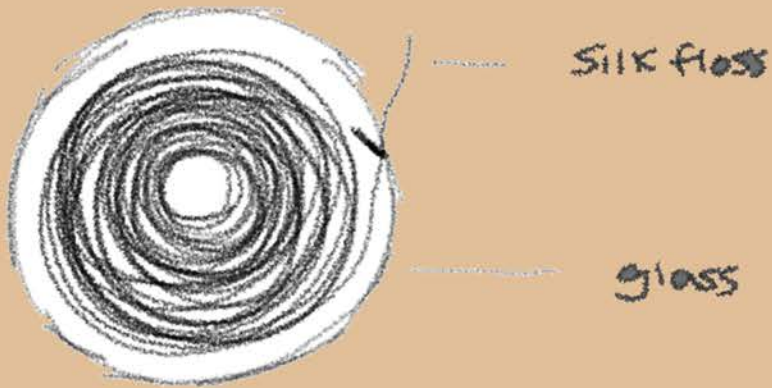

humanely harvested pig bristle nylon 4.

replacement bristles will be sent in paper boxes

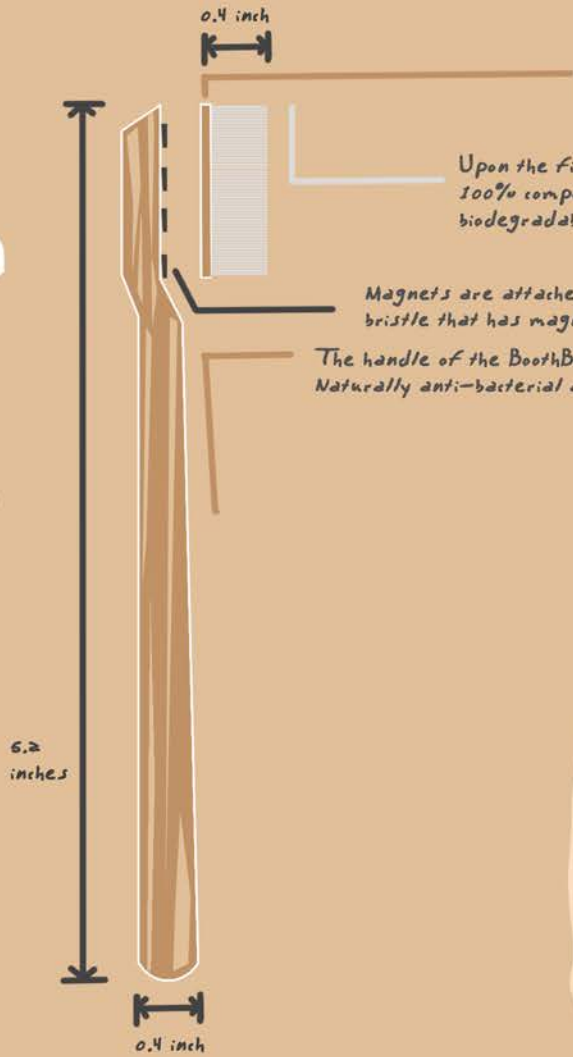

Bamboo

Initial Sketches:

# BoothBrush

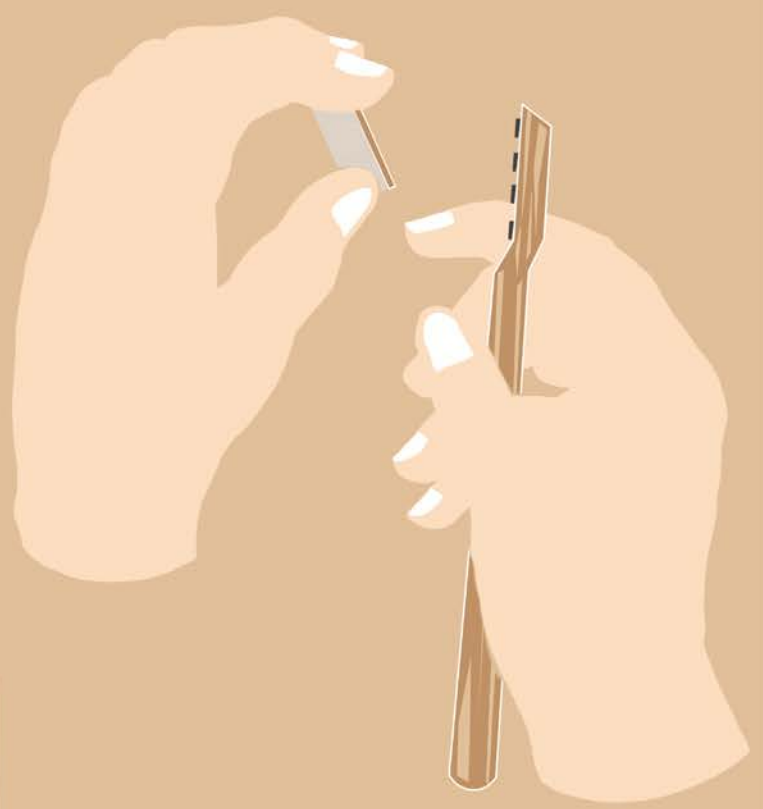

The back of the bristle is made of bamboo and has a magnet embedded inside

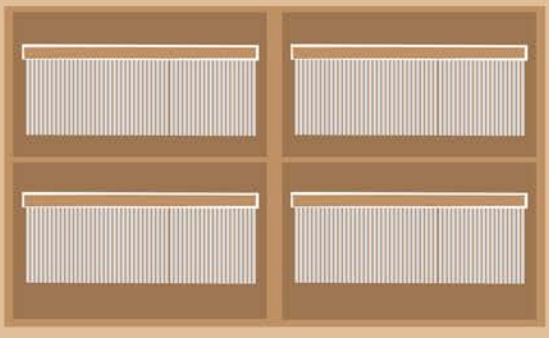

Upon the first subscription, customers may choose between bristle made with 100% compostable pig hair from humanely raised animal industry, or with biodegradable Nylon4

Magnets are attached to the handle to connect with the separable bristle that has magnets embedded into the bamboo back.

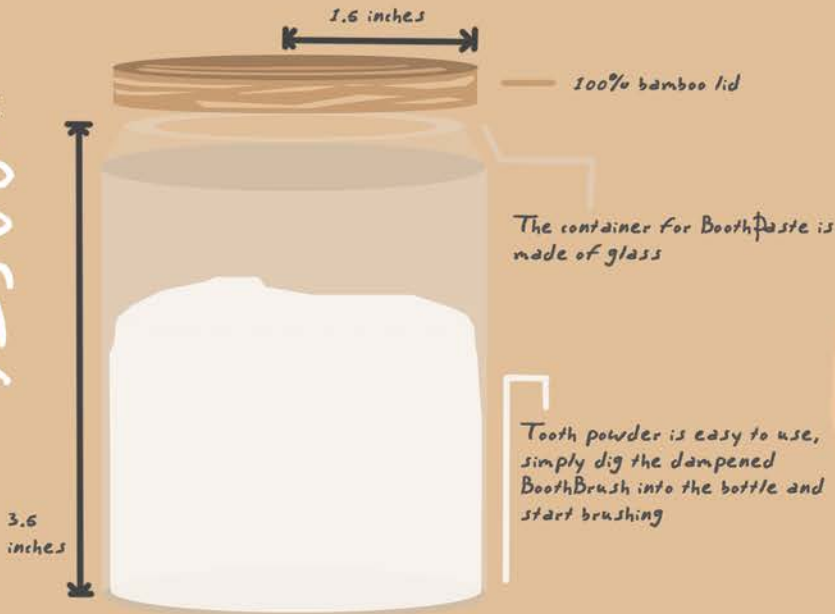

The handle of the BoothBrush is made of 100% bamboo, Naturally anti-bacterial and anti-microbial

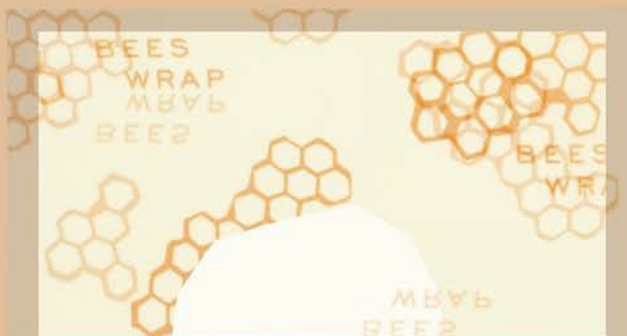

Replacement bristles are sent every four months with four bristles at a time, which follows the scientifically suggested period for toothbrush change. The package is made of recyclable paper with no use of glue or nails.

# Booth PASTE

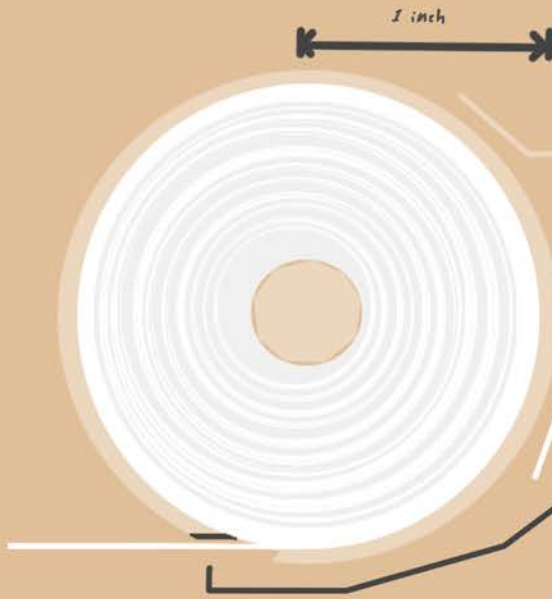

Cooperating with BeesWrap, the replacement tooth powder will be sent in sealed BeesWrap. This washable, reusable, and compostable alternative to plastic wrap can be sealed simply with heat, and customers may reuse the Wrap later for food packaging etc..

After putting the tooth powder onto the BeesWrap, a machine will heat up the three sides of the Wrap and created a sealed space for the tooth powder that ensures it can be delivered safely.

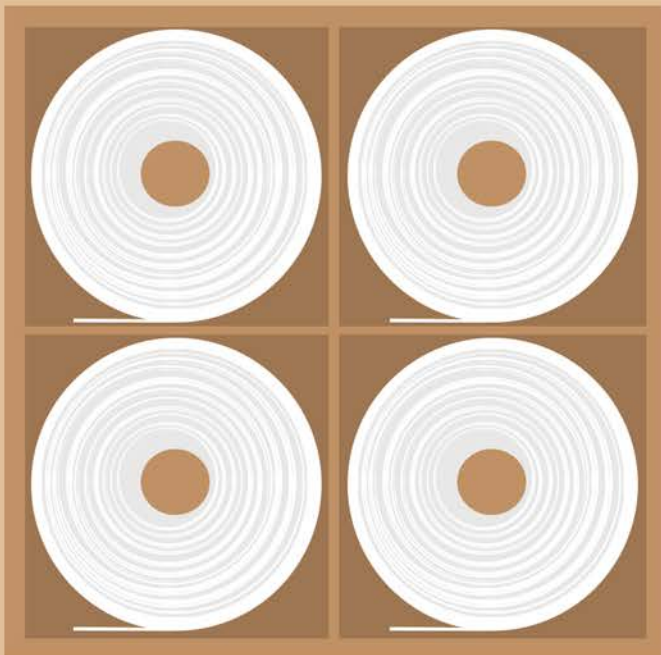

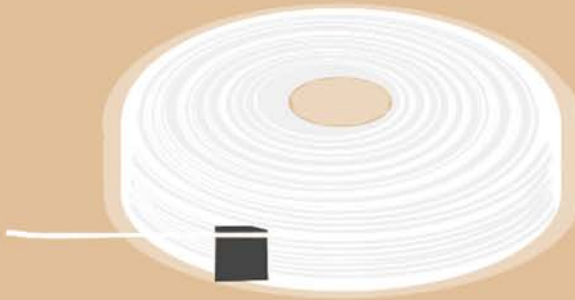

# BoothFloss

Glass made Boothfloss container, classy and easy to carry with its decent size

The floss is made of silk and has natural plant wax coating, smelling like mint

Pulling the floss out with the length you want and cut it with the blade attached inside the glass container

The glass container has a openable lid for replacing used-up floss. Replacement for Boothfloss will be sent in a set of four. The package is made of recyclable paper with no use of glue or nails.
