

## **Problem:**

As humans "robbed" the natural resources, Earth was forced to change. We have lost so many woods worldwide, which directly resulted in climate change and endangered human beings. Besides planting real trees, humans have to find a more efficient method to decelerate environmental degradation.

## Re - For Rest

A office  
building  
combined  
with  
greenhouse  
and birds'  
shell

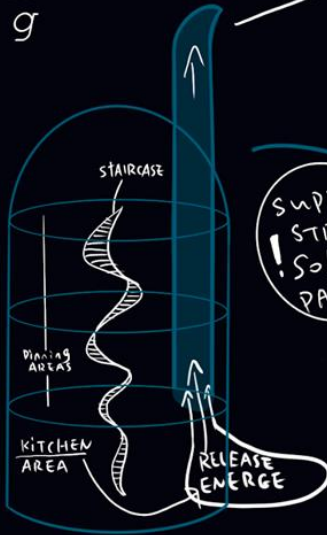

Office Building

PLANTS LAB & RELAX AREAS

Backup power house

Dinning Building

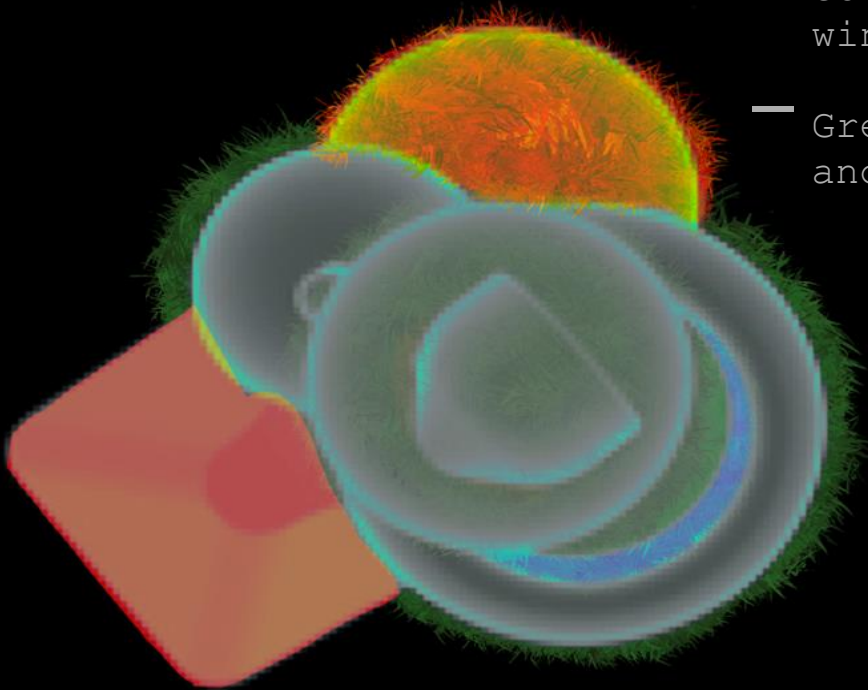

SUPER STRONG SOLAR PANEL

\* Provide Electricity for All activities going on inside.

(JUST in case) SOLAR PANEL meets constant BAD WEATHER

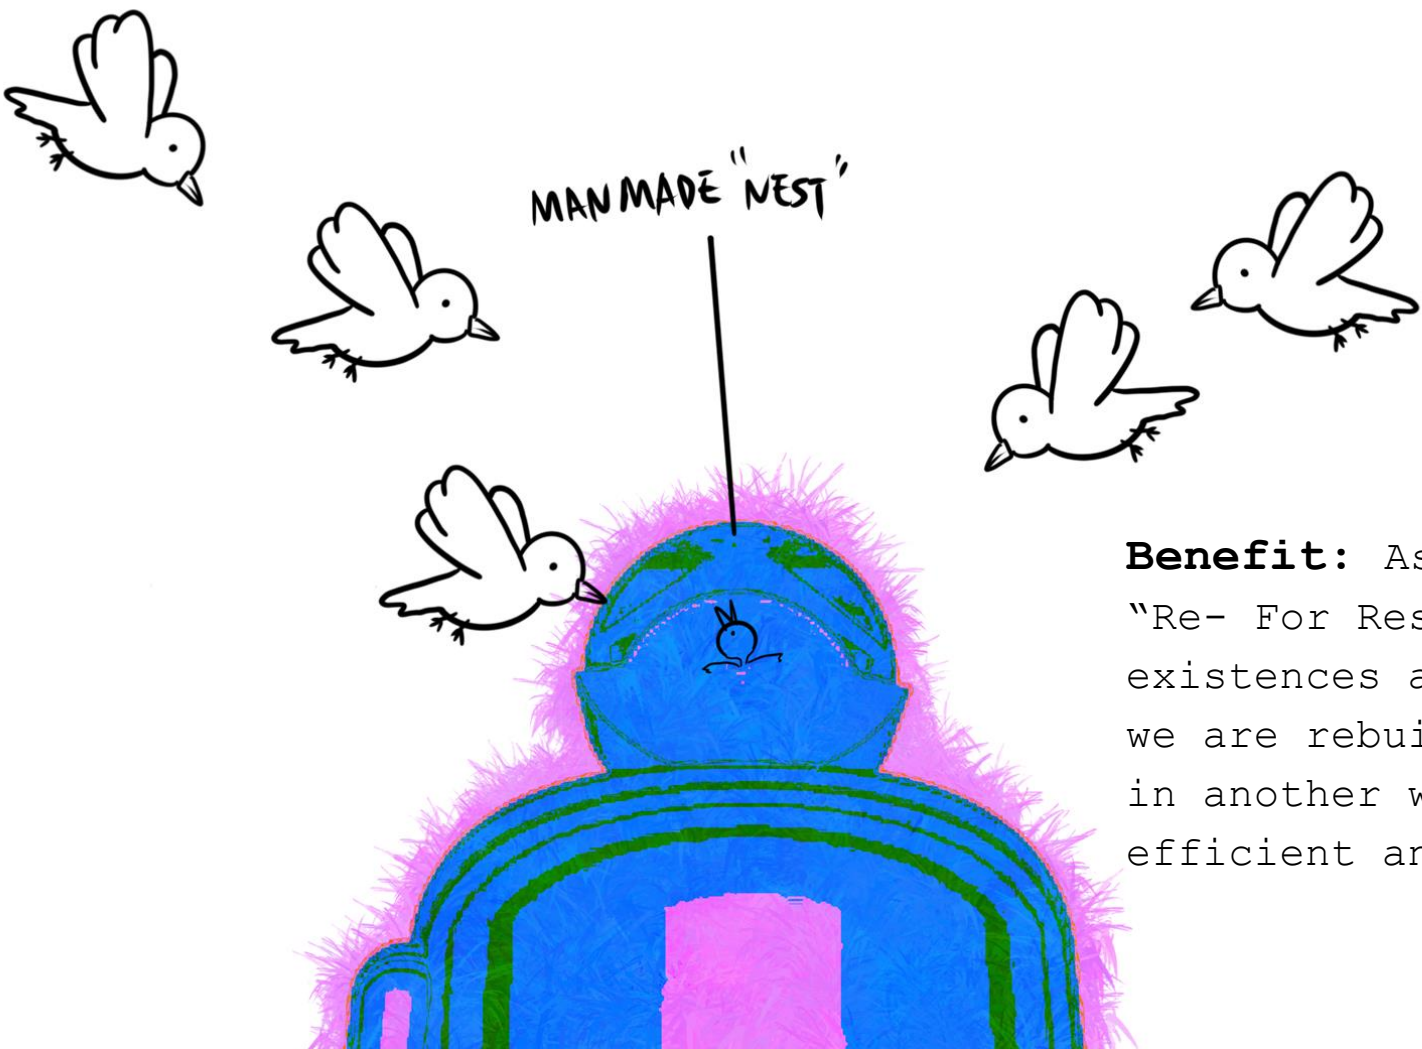

Structure

- All buildings will be made by recycled unpoisoned plastic materials
- Green plants will not be that condense, and there will be windows!
- Greens on the wall will absorb  $\text{CO}_2$  and produce  $\text{O}_2$

ACT LIKE A REAL TREE

Details &  
Clarification

MAN MADE "NEST"

**Benefit:** As more and more "Re- For Rest" mimic trees' existences and even functions, we are rebuilding our planet in another way, a more efficient and practical way!

**END .**

**THANK FOR YOUR LISTENING**

**U R ONE OF EARTH SAVORS NOW!**
